To set up Docker

1) Download the "docker_setup" folder from https://github.com/guyw04/SurgT_challenge

2) Create an environment requirements file in ""docker_setup" - "surg_t_requirements.yml"

For condo:

    conda env export > surg_t_requirements.yml

For virtualenv:

    pip freeze > surg_t_requirements.yml

3) Run the following commands the build Docker

    sh build.sh
    sh start.sh

4) Please send an email to jmc19@ic.ac.uk, containing the following information:
    1   link to docker image (containing SurgT_benchmarking configured to your algorithm);
    2   team members (names + email);
    3   info about the datasets that have been used for training.
